

Basic Electricity for

Hearth Professionals

Wednesday, May 4th, 10:00 am to 3:00 pm (including a one-hour break where lunch will be provided)

This course is fundamental for every gas hearth appliance service technician since it covers the principles of operation for every control system. Instruction is divided into four one-hour courses:

- Electricity basics - the relationship of voltage, current, and resistance
- Electro-magnetism and thermogeneration - the basis for all millivolt systems
- Electronic ignition control, including diagnostic methods for electrical issues.
- Practical instruction on important measurements when working with SIT ProFlame, the Maxitrol GV60, and Dexen electronic ignition.

Instructor: Tom Parks

The class will be held during the regional meeting

Robert F. Hatcher Sr Conference Center, 100 University Parkway, Macon, Georgia 31206

Tools are supplied for use in the class.

Tool Kits for personal use will be available for purchase.

Cost: \$75.00 for 1st attendee

\$50.00 for each additional attendee

(Lunch included)

➤ If you are unable to attend this class, additional dates/locations are listed below:

- June 8 - Sevierville, TN
- July 13 - Raleigh NC
